# An innovative visual tool identifying Education & Development opportunities for pharmacy technicians, incorporating the APTUK Foundation Pharmacy Framework

Mandeep Kaur Matharoo - Senior Pharmacy Technician Patient Services
Gill Shelton - Principal Pharmacist Education & Training

**Pharmacy Education & Training Team** 

## Introduction

Ours is a large teaching hospital with a wide variety of pharmacy technician roles. Pharmacy staff are geographically spread across the site, with a diversity of line managers

Staff feedback demonstrated poor awareness of available Education and Development (E&D) opportunities (see Figure 1)

Launch of the APTÚK Foundation Pharmacy Framework was inspirational in this project as we were keen to promote and support it's use for all of our technicians

## Aim

To illustrate Education & Development opportunities for pharmacy technicians; incorporating and highlighting the National APTUK Foundation Pharmacy Framework (FPF)

## **Objectives**

To illustrate available E&D opportunities for pharmacy technicians at all stages of the career pathway

# To map E&D opportunities to:

- Agenda for Change banding
- Trust Performance Standards

To embed the FPF as a development support tool for all pharmacy technicians

To enhance staff personal development plans (PDPs)

#### **Knowledge of development opportunities** available for pharmacy technicians ■ I am confident that I know what development opportunities are 26% 32% available ■ I have some idea of what development opportunities are 42% available ■ I do not know of any development opportunities that are available in my role Figure 1

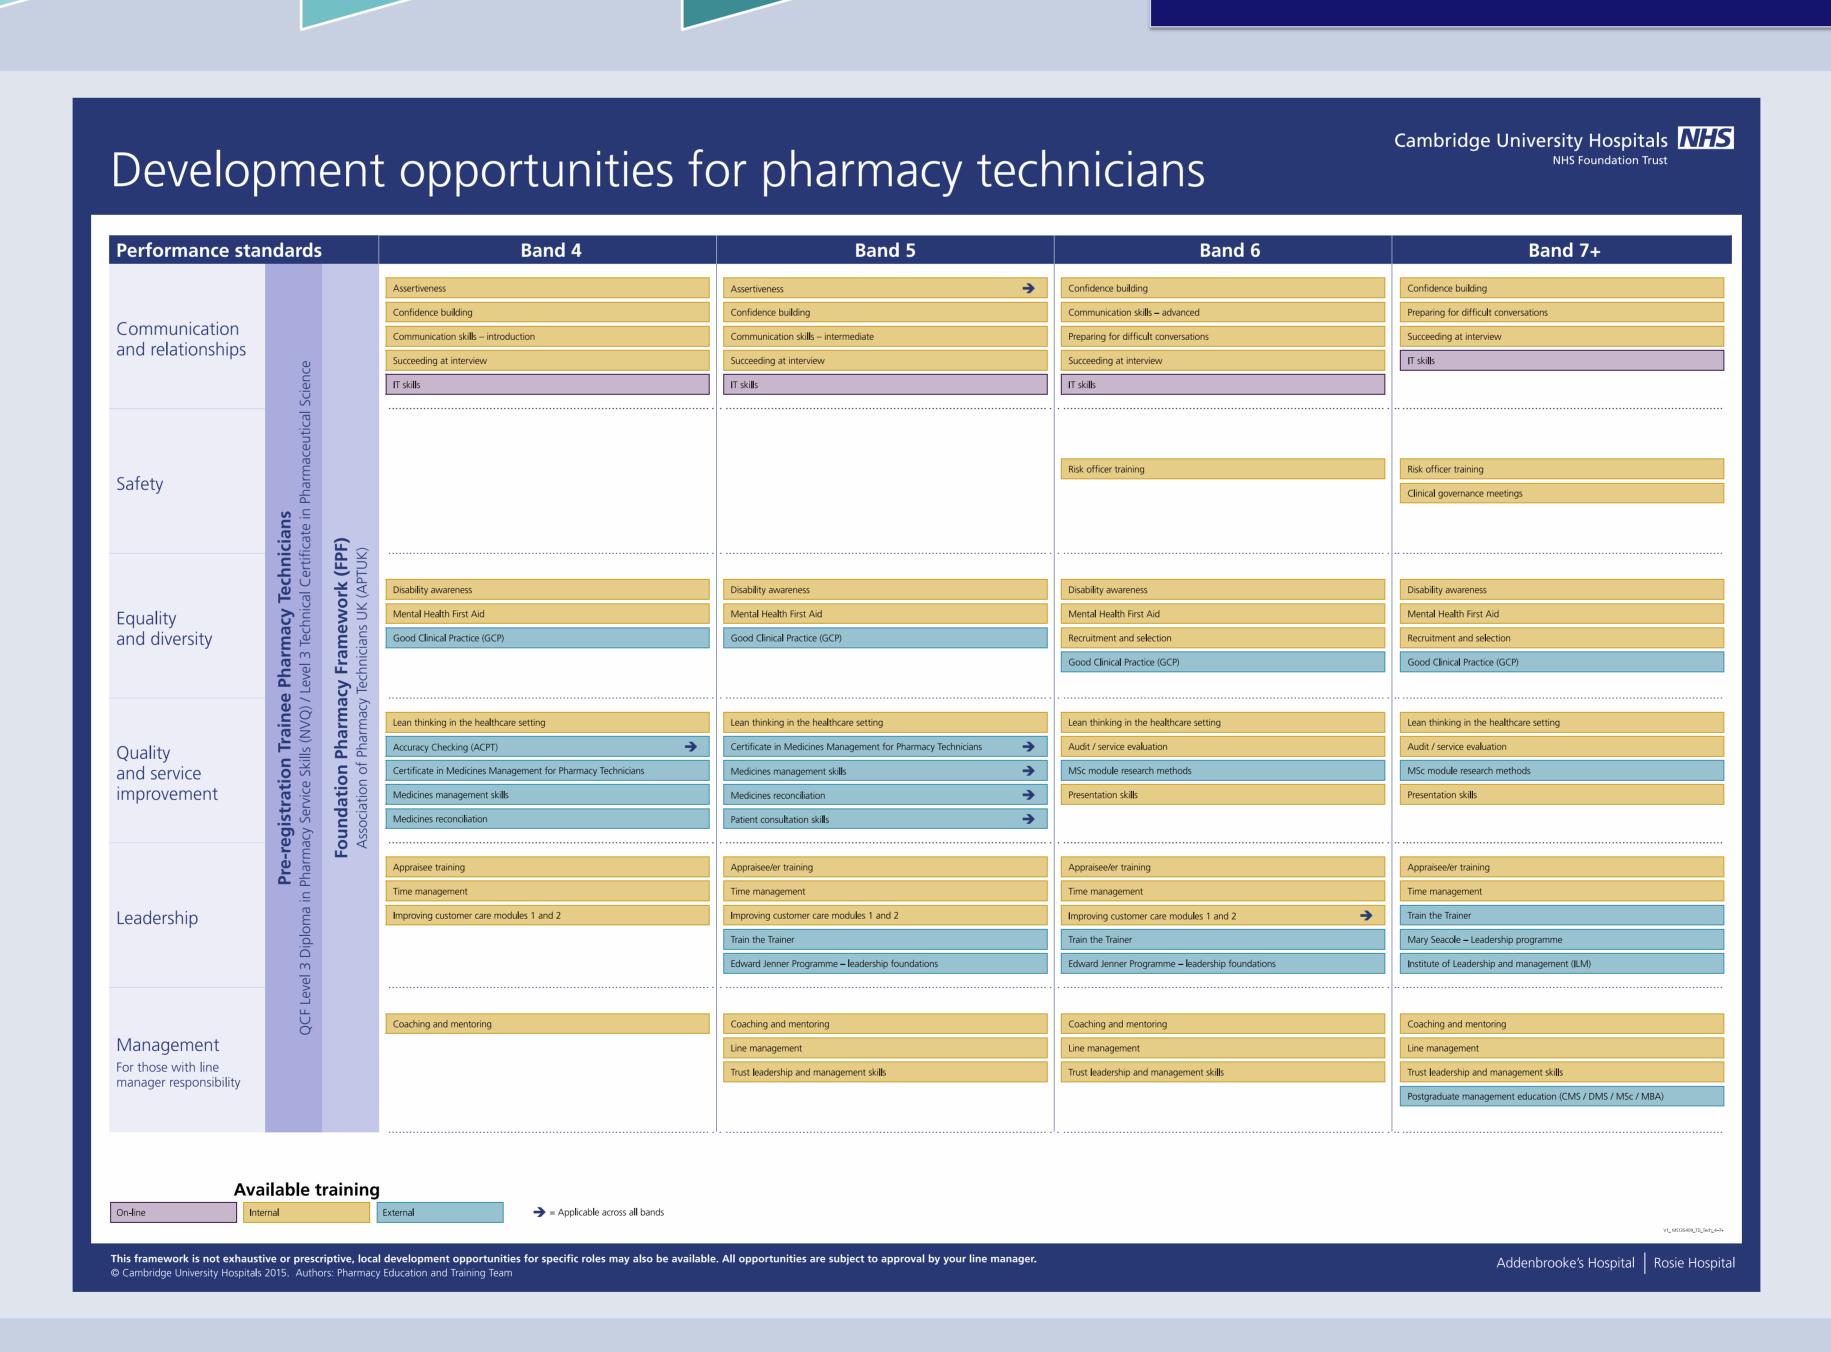

### Method

- ➤ The Education and Training team designed a visual interpretation of available E&D opportunities as a poster template for each key staff group: Pharmacy technicians, Pharmacists, Pharmacy support staff and Administration & Clerical staff
- Draft posters were submitted to a focus group for discussion and feedback

Figure 2

## Conclusion

A novel, innovative, multi-dimensional tool demonstrating equity of E&D opportunities for all staff groups has been created. (see Figure 2) Future plans include:-

- > Launch of the poster to the department
- > Follow up surveys to measure increased awareness and uptake of E&D opportunities.
- > Section-specific posters e.g. Aseptics
- Trust-wide sharing of concept
- Developing our vision for wider use across the pharmacy profession
