

“A Warm Reception for the ThermoFlash Pro”

ThermoFlash® PRO LX-261 is the latest solution in patient temperature reading from Helapet, using non-contact technology to improve patient comfort whilst minimising cross contamination. Officially launched and independently trialled in the United Kingdom, ThermoFlash® has been successfully utilised by clinical professionals across the country to provide the highest standard of patient care, whilst supporting stringent infection control measures.

Introduced in 2011, ThermoFlash® has been officially validated and successfully passed by Valcomm Ltd, proving its accuracy and versatility for professional medical operations. Helapet offer quality support and user training via its dedicated and experienced account management team, ensuring full confidence for our clients in the usage of the ThermoFlash® device.

In line with the increasing standards of patient comfort, ThermoFlash® can boast a versatile range of functions that make this thermometer ideal for use with babies, the elderly, mentally ill patients, and individuals with highly sensitive skin conditions. Independent UK trials of ThermoFlash® has highlighted its ease of use and superior applications in minimising disturbance to patients, delivering improved patient comfort whilst retaining the valued accuracy required for medical practice.

Reducing the risk of cross-contamination, ThermoFlash® completely eliminates the need for replacement disposable probe covers, providing an immediate saving for the user. Increasing client feedback has highlighted the considerable savings of using the ThermoFlash's infra-red technology against traditional tympanic thermometer devices.

ThermoFlash® represents an increasing trend in the use of non-touch treatments in patient care, and Helapet takes pride in working with their clients to ensure the best effective application of ThermoFlash® in day-to-day working operations.

If you would like the opportunity to learn more about the ThermoFlash® Non-Contact Thermometer, please contact Helapet on **0800 0328 428** or visit www.helapet.co.uk for a free demonstration and supporting information.
