

Intrathecal Bag

Transparent, disposable bag designed for secure site to site transportation of intrathecal drugs. The Helapet Intrathecal Bag is manufactured from strong, clear polyethylene material for easy visibility of contents, with a red and white colour coded front panel for easy labelling and logging of information.

Alcohol resistant ink allows liberal spraying with alcohol for disinfecting purposes. The sealable fold over closure allows for tamper-evident onetime use, with a perforated line for easy access. Available non sterile with full lot traceability.

Features and Benefits

- ✓ Clear packaging to minimise errors
- ✓ Secure tamper-evident seal
- ✓ Perforated for easy access
- ✓ Tough 300 gauge / 75 micron polyethylene material
- ✓ Write-on panel for logging valuable information
- ✓ Alcohol resistant ink
