

MiniPorter™

Carrier System

The ideal solution for transporting temperature sensitive samples, the Helapet MiniPorter™ is validated to securely accommodate a variety of temperature controlled products including vaccines and blood units.

Using fully replaceable components, the MiniPorter™ Carrier System can maintain the desired temperature threshold and provide effective thermal protection in variable weather conditions.

The robust outer bag incorporates a secure Velcro® fastening and long shoulder strap. Available in blue, a clear PVC window allows instructions and important documentation to be inserted and visible to users.

Features and Benefits

- ✓ Validated temperature control
- ✓ Includes Medicoool® cool pack
- ✓ Secure Velcro® fastening
- ✓ Clear PVC Window for inserting delivery data
- ✓ Long over-the-shoulder strap
