

Steri-Dropper™ Bottles

Steri-Dropper™ Sterile Dropper Bottles are a latex free, non-toxic and non-pyrogenic alternative to the traditional glass dropper bottle.

Avoiding the need for lengthy and expensive sterilisation measures, Steri-Dropper™ Bottles come in sterile packs and are ideal for accurate preparation and dispensing of sterile formulations in cleanroom environments.

Provided in a range of four sizes, each pack contains two separate resin free bottles with snap-in dropper tips and polypropylene screw caps.

Supplied sterile in an easy peel blister with low-linting Tyvek® backing.

Features and Benefits

- ✓ Easy squeeze polyethylene
- ✓ Natural colour for easy visual identification
- ✓ Available in four different sizes
- ✓ Recyclable blister packaging
- ✓ Sterile packaged in pairs
