

Arisure Closed Male Luer

Scan Me for Web Page

The Arisure[®] Closed Male Luer (CML) is easy to use and completely needle-free. It forms a dry disconnect with any Arisure[®] needle-free valve. It remains closed when not accessed, preventing accidental spills or discharge of hazardous drugs.

The Arisure[®] Closed Male Luer forms part of the Arisure[®] Closed System Transfer System, designed for healthcare professionals to ensure the safe compounding, transport, and delivery of hazardous drugs. This keeps you focused on what matters — the patient.

Features and Benefits

- Dry disconnect with Arisure needle-free valve for reduced exposure to harmful drug residue
- ✓ Safe and simple transfer of compounds
- Mechanically closed when not accessed, preventing accidental leaks or spills
- Microbiologically closed, reducing the risk of contamination
- Maintains seal integrity, keeping all connections safe even when accessed multiple times
- No special adapters means less time searching for parts and more time caring for your patients
