

Biogel[®] NeoTech

Chemotherapy Protective Synthetic Overglove

Biogel[®] NeoTech is a synthetic critical environment glove made from polychloroprene. It can be used alone or in combination with the Biogel[®] NeoTech Indicator Underglove for improved protection of the goods handled as well as of the operator. It has been tested and cleared for use with chemotherapy agents. The Biogel[®] NeoTech is recommended to be used in any critical environment or controlled environment when a high quality sterile glove is required for protection from cross contamination, preferably in combination with the Biogel[®] NeoTech Indicator Underglove. Biogel[®] gloves are designed to be comfortable with maintained tactile sensitivity even when double gloving. They are manufactured using rigorous quality checks, numerous washing cycles and air-inflation testing of every single glove.

Features and Benefits

- ✓ Suitable for work involving chemotherapy*
- ✓ Puncture indication system when worn in combination with Biogel[®] Neotech Underglove**
- ✓ Highly resistant, stretchable latex-free material
- ✓ Powder free with low endotoxin levels
- ✓ Fully textured for good grip of products
- ✓ Ready folded long beaded cuff
- ✓ Paper-free packaging

*permeation data on request **see overleaf
