Welcome to Helapet

Helapet has been established for over 40 years, supplying quality medical consumables to the NHS, Pharmaceutical and Lab Industries. Our products are designed for the assured protection the practitioner during the handling, administration and clean up of hazardous substances, whilst helping to provide top quality patient care.

We are proud to offer a dedicated selection of medical devices, IV lines and single-use consumables, supported by expert Account Management, comprehensive training and online resources, highlighting our commitment to ensure optimal value to our NHS customers.

OUR CUSTOMER COMMITMENT

At Helapet we pride our success and growth on our ability to put the customer first. By placing our customer at the centre of our brand, we continually seek to understand their wants and needs, enabling us to provide the best customer experience. We have adopted a highly customer-centric culture where all Helapet staff are trained and empowered to improve how we do things for the ultimate benefit of our clients.

OUR KNOW-HOW AND EXPERTISE

Helapet uses our wealth of expertise to deliver a high-quality customer experience, fostering positive, long-term relationships with our clients. Our service places accessibility, close consultancy, education and technical support at the forefront of what we do, to effectively understand and help our customers through their journey.

Email sales@helapet.co.uk to arrange an on-site visit from your dedicated territory Account Manager.

“Always found Helapet to be extremely efficient and helpful”

District General Hospital

Our carbon reduction strategy

We are passionate, committed and actively engaging in several initiatives to reduce our carbon footprint.

It is the responsibility of this generation to implement a sustainable framework for the future. We continuously review all areas of our business processes and implement initiatives to further our contribution towards climate control.

Steps we are taking...

Product Packaging

- ✓ Introduced bubble Wrap with 55% recycled content
- ✓ 100% recyclable adhesive paper tape replacing plastic tape
- ✓ Use pallet wrap film with 55% recycled content

Energy Efficiency Improvements

- ✓ Passive Infrared Sensors (PIRs) fitted in some areas of the building
- ✓ Installation of new cleanroom air handling units which are more energy efficient

Our Partners

- ✓ We choose to work with environmentally responsible partners who endeavour to reduce their environmental impact
- ✓ Our courier service guarantee that every parcel they deliver is carbon neutral
- ✓ We choose our energy supplier because they help to achieve commercial and sustainability goals through their own renewable source electricity

New Initiatives

- ✓ We sourced Eco Sharps Bins containing at least 40% recycled materials (see page 38)
- ✓ We survey and assess each of our employees' journey to and from work, redressing our energy use to be as efficient as possible
- ✓ We adopted Ecosia as our primary search engine. Ecosia plants a tree for roughly every 45 online searches, helping to reduce the impact of climate change

Future Plans

- ✓ We will continue to explore and expand our use of renewable energy sources
- ✓ Voltage optimisation

*This is the best time to push forward,
we continue to push for improvement."*

Chemotherapy Protection

Our protective products facilitate safe preparation, administration and spill management of chemotherapies in the workplace

Arisure® Closed System Transfer Devices (CSTD)

Arisure® is a safe, needle-free solution for preventing the risk of drug and user contamination, by maintaining the closed transfer of medicines from preparation to administration.

Comprehensive protection for the practitioner, the drug and the patient.

Arisure® consists of 3 simple-to-use components, working together to prevent contamination of the solution, whilst protecting the healthcare professional from exposure to harmful aerosols and droplets.

Using standard luer connections, Arisure® Closed System Transfer Devices can be quickly integrated in standard work processes, improving safety, speed and efficiency.

Arisure® Closed Vial Adapter

The Arisure® CVA is completely closed, helping to reduce the risk of exposure to hazardous drugs while providing a safe and simple solution for drug reconstitution and transfer.

- Mechanically and microbiologically closed to prevent the escape of harmful vapor and aerosols into the environment*
- Dry disconnection reduces exposure to harmful drug residue
- Maintains drug vial sterility for up to 7 days*
- 13mm and 20mm vial size options available

*data available on request

Datasheet

Product Code	Description	Box qty.
IV0051	Arisure® Closed Vial Adapter 13mm	50
IV0053	Arisure® Closed Vial Adapter 20mm	

Arisure® Closed Male Luer

Forms a secure, dry disconnection with any Arisure® needle-free valve. Once disconnected it remains closed stopping solution from leaking through, preventing accidental spills or discharge of hazardous drugs.

- Safe, dry disconnection reducing exposure to harmful drug residue
- Mechanically closed when not accessed, preventing accidental leaks or spills
- Microbiologically closed, reducing the risk of contamination
- Maintains seal integrity even when accessed multiple times

IV0058

Datasheet

Product Code	Description	Box qty.
IV0058	Arisure® Closed Male Luer	100

Arisure® Dry Spike

Provides an easy, needle-free method of transferring fluid into an IV bag whilst maintaining a closed system.

- Simple, secure attachment to an IV bag
- Forms safe, dry disconnect when used with Arisure® CML reducing risk of harmful drug contamination
- Independent lumens for both drug admixture and IV access for patient delivery
- High flow rate for easy transfer of viscous solutions

Arisure® system works in...

Pharmacy

Nursing

Neutraclear™ bidirectional needleless injection valves

Small, compact with a reverse split septum, providing a closed system and microbiological barrier to help reduce contamination. Due to its low priming volume, this device is suitable for paediatric use.

IV0200

Product Code	Description	Inner box qty.
IV0200	Bidirectional needleless injection valve Neutraclear™	200
IV0200C	Bidirectional needleless injection valve Neutraclear™ + cap	

Vial spike with bidirectional valve

Vial spikes support needle-free preparation of medicines from vials, reducing the risk of sharps injury. Bidirectional valves close on disconnection from a syringe, reducing the risk of drip contamination.

EL507

IV0509

IV0509B

Product Code	Description	Inner box qty.	Outer box qty.
EL487	Vial micro spike with bidirectional valve	200	1600
EL503	14 mm snap-on vial spike with filter for solution and bidirectional valve	40	640
EL507	Ø 14 mm snap-on vial spike with closure and bidirectional valve	40	640
IV0509	Long vented universal spike with Neutraclear™	40	-
IV0509B	Long vented universal spike with C-Flow bidirectional valve and 0.22µm filter	40	-
EL510	Short vented universal spike with Neutraclear™	40	640

Spike for bag or vial with bidirectional valve

Spikes are typically used to facilitate the safe and seamless transfer of hazardous medications between the syringe, IV bags or vials. A swabable valve supports aseptic technique and reduces the risk of drip contamination.

EL501

EL508B

Product Code	Description	Inner box qty.	Outer box qty.
EL501	Spike with Neutraclear™ for bag	60	960
EL506	Vented bag Spike with bidirectional valve + anti-injection valve for sampling, for bag	50	800
EL508	Spike with Neutraclear™ and air vent for bag or vial	60	960
EL508B	Spike with C-Flow bidirectional valve and air vent for bag or vial	40	640

Lateral line with non-return valve connection for administration line with bidirectional valve

CHD441

Product Code	Description	Inner box qty.
With injection valve - Amber		
CHD439	Y vented lateral line for preparation and administration of chemotherapy + bidirectional valve	100
CHD441	Y vented lateral line for preparation and administration of chemotherapy with 0.22µm filter + bidirectional valve	

Lateral line with simple luer lock connection for administration line with non-return valve

CHD301AL

Product Code	Description	Inner box qty.
With injection valve - Amber		
CHD301AL	Vented lateral line for preparation and administration of chemotherapy + 90° bidirectional valve	100

Administration line with bidirectional valve

CHD438

Product Code	Description	Inner box qty.
CHD436	Vented 2 access administration line (tree) + bidirectional valve for independent administration set	100
CHD438	Vented 4 access administration line (tree) + bidirectional valve for independent administration set	

Y vented set for preparation, administration and flushing of chemotherapy with bidirectional valve

EL604	Adapter with C-Cure™ for secure sampling, amber tube L = 5cm - Male luer lock	50

Chemotherapy Spill Kits

Helapet Home Chemotherapy Spill Kit

Quick response kit for patients, doctors, nurses and oncology practitioners to deal with a spillage of chemotherapy substances away from secure hospital environments.

CS0999

Product Code	Description	Box qty.
CS0999	Helapet Home Chemotherapy Spill Kit	6 pcs/pck

berner

Berner Cytotoxic Spill Kit

Designed specifically for handling cytotoxic drugs, each kit provides the user with a selection of necessary aids in the clean-up and disposal of hazardous liquid spills.

CS4004

Product Code	Description	Box qty.
CS4004	Berner Cytotoxic Spill Kit - Size 7.5 Latex Glove and Medium Gown	2 pcs/pck
CS4004A	Berner Cytotoxic Spill Kit - Size 9 Latex Glove and Large Gown	2 pcs/pck
CS4004L	Berner Cytotoxic Spill Kit - Size 9 Neoprene Glove and Large Gown	2 pcs/pck
CS4004N	Berner Cytotoxic Spill Kit - Size 7.5 Neoprene Glove and Large Gown	2 pcs/pck

Berner XP Cytotoxic Spill Kit

XP stands for extra protection and this is exactly what you get. Each self-contained kit contains a list of essential tools and PPE to handle both wet and dry cytotoxic spills.

CS4124

Product Code	Description	Box qty.
CS4124	Berner XP Cytotoxic Spill Kit - Medium	1 pc/pck
CS4133	Berner XP Cytotoxic Spill Kit - Large	1 pc/pck
CS4135	Berner XP Cytotoxic Spill Kit - XX Large	1 pc/pck

Berner ChemoSorb Pads

Placed over hazardous spills, the absorbent material converts liquids into a gel substance for safe containment and disposal.

CS120016

Product Code	Description	Box qty.
CS120016	Berner Chemosorb Pads - 38cm x 54cm	10 pcs/pck

Chemotherapy Resistant PPE

berner

Berner Cytotoxic Nitrile Glove

Manufactured from a copolymer of particular plastics, Berner Nitrile Cytotoxic Gloves guarantee an exceptionally high protective capacity against cytotoxics* and biological agents.

Product Code	Description	Box qty.
GN3010	Size 6 (XS) Non-Sterile	100 pcs/pck
GN3015	Size 7 (S) Non-Sterile	100 pcs/pck
GN3020	Size 8 (M) Non-Sterile	100 pcs/pck
GN3025	Size 9 (L) Non-Sterile	100 pcs/pck
GN3030	Size 10 (XL) Non-Sterile	100 pcs/pck

Berner Cytotoxic Gown

Designed to offer safe frontal protection in the handling of cytotoxic agents*, combined with good breathability and user comfort.

Product Code	Description	Box qty.
6700	Berner Gown – Non Sterile - Small	15 pcs/pck
6800	Berner Gown – Non Sterile – Medium	15 pcs/pck
6900	Berner Gown – Non Sterile – Large	15 pcs/pck
10072	Berner Gown – Non Sterile – Extra Large	15 pcs/pck

Berner Cytotoxic Oversleeves

Specifically designed for optimal arm protection whilst handling cytotoxics*.

Product Code	Description	Box qty.
6010	Berner Oversleeves – Non Sterile - Size Small/ Medium	50 pairs/pck
6000	Berner Oversleeves – Non Sterile – Extra Large	50 pairs/pck

Safe Infusion Therapy

Choose from a comprehensive range of extension lines and safety devices, designed to optimise safety of infusion practices

SPYDER

Multi-way extension lines

Multi-way extension lines
For **optimised safety** of **infusion** practices

SPYDER

Multi-way extension lines

FOR OPTIMIZED SAFETY OF INFUSION PRACTICES

The Y-shaped structure of the Spyder multi-way extension lines optimises the safety of infusion practices

Low or no shared volume:

» injection of products as close to the patient as possible

- limits drug interactions⁽¹⁾
- avoids variation in the relative flow rate of the drugs⁽²⁾

Allows dedication of each line of a central line

Low residual volume:

By using a small diameter tube (0.5 mm inner diameter), residual volumes can be divided by four compared to a tube with a diameter of 1 mm.

- limits the volumes needed for rinsing
- particularly suitable for use in neonatology and pediatrics

A complete range:

- 2 to 6-way extension tubing
- internal diameters from 0.5 to 2.5 mm
- available in PVC or low sorption PE/PVC
- pressure resistant

Customized extensions on request.

EVA Infusion Bags

EVA Infusions Bags w/ Needle-free Connector

Ethylene vinyl acetate bags containing a needle-free valve at the port end. Available in different volumes from 250ml to 1,000ml. Bags are supplied with pinch clamp.

- DEHP and Latex free
- Suitable to use in automated compounders
- Safe, needle-free connection
- Transparent for easy inspection

EVA Infusion Bags

Product Code	Description	Box qty.
QE250V	250ml transparent EVA infusion bag with luer lock connection and needle-free valve	100
