Vaccine MiniPorter™

CP1425/1017

Lid

1 x Medicool® MC11
Weight: 525g per Medicool®

Medimat

Product (Vaccines)

Inner moulding
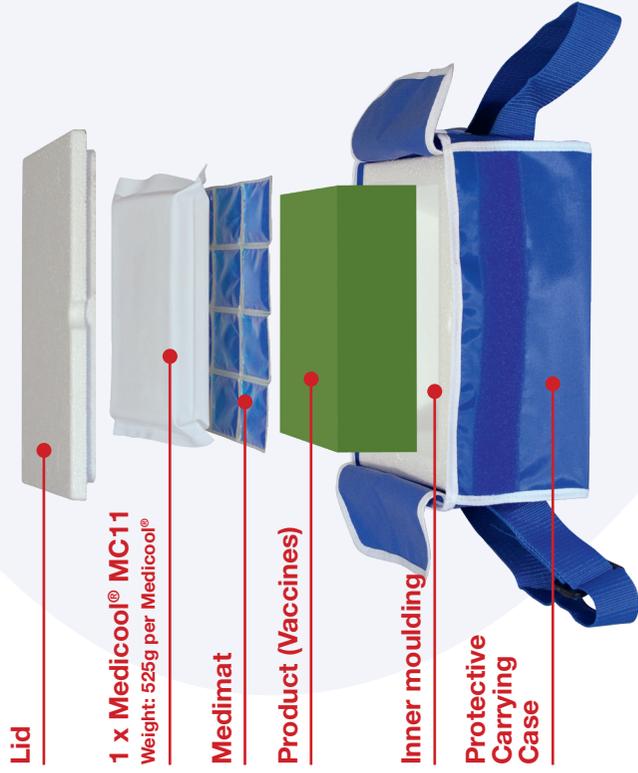

Protective Carrying Case

Prior to use:

Before inserting the Medicool® cool pack into the Vaccine MiniPorter™ system, please follow these instructions:

- Freeze 1 x Medicool® 11 for a **minimum** of 24 hours at -18°C*.
- Refrigerate Medimat for a minimum of 24 hours at +5°C.
- Remove Medicool® from freezer at least 20 minutes prior to use.

Instructions for Use - Please Turn Over

*Due to the potential variation in fridge performance, frequency of opening and other fridge contents, it is recommended that MediCool® pre-conditioning is validated by the user.

Instructions for Use

System assembly and product packing

Pack and seal the **MiniPorter™** system swiftly, as follows:

1. Place product to be transported in base of **MiniPorter™**.
2. Place refrigerated Medimat directly on top of product.
3. Place Medicool® 11 on top of Medimat.
4. Close the lid and ensure it is sealed by closing the outer carrying case immediately.
5. Only open the **MiniPorter™** if necessary and remember to re-seal as soon as possible.

Although the **MiniPorter™** has been validated so that the product can be added and removed from the sealed system during use, do not open unnecessarily and remember to re-seal the system quickly.

To re-use the system:

In case you decide to re-use the system, please follow these steps below prior to conditioning the Medicool® cool pack:

- A weight check and visual squeeze check will need to be carried out to ensure there is no loss of liquid. If the Medicool® is ±20g different to the weight shown on the Medicool® (overleaf) or shows any signs of leaking, then it is recommended that it is disposed of.

- We recommend that any chipped or broken polystyrene inners are replaced before use as this can affect the thermal performance of the **MiniPorter™**.
