

# Neutraceutical™

## Needle-free Connector

Small, compact with a reverse split septum and sealing ring which provides an effective closed system and microbiological barrier to reduce the risk of contamination. Completely transparent with a low priming volume, Neutraceutical™ is suitable for paediatric doses, precise flushing and blood sampling.

Neutral fluid displacement when disconnected minimises the risk of blood reflux and occlusions occurring when used with a catheter. This helps to save on time required for any additional treatments and potential catheter restarts.

### Features and Benefits

- ✓ Swabable septum surface
- ✓ Low priming volume
- ✓ Closed membrane connection reducing risk of contamination
- ✓ Ideal for paediatric doses
- ✓ Fully transparent for clear view of any residual fluids
- ✓ Neutral displacement preventing occlusion and infection

## Technical Data

	IV0200
Housing material	Polyoxymethylene; Polycarbonate; Silicone
Length	2.8cm
Residual Volume	0.04ml
Properties	Neutral Displacement (-0.004ml); Disinfectable Needle-free Valve; Latex Free; DEHP Free
Maximum injection pressure	22 bars (325 psi) at a rate of 10ml/s
Back pressure	2.6 bars (37 psi)
Flow rate	>125ml/min (average)
Maximum no. of activations	400
Luer access	Swabable luer lock connection
Packaging	Individually blister packed; 200 x blisters per pack
Sterilisation	ETO
Compliance	CE marked (MDD)
Shelf Life	35 months from date of manufacture
