

Spring has sprung and we welcome you to issue 9 of the Helapet newsletter.

This issue showcases some exciting company developments, with the addition of three new products to our portfolio and the launch of our brand new website, just to name a few.

We are also pleased to welcome two new starters to the team. Introducing Pierette Oates, our Office Administrator and Stanton Pereira as our cleanroom Maintenance Technician. We hope you find our newsletter valuable, please share your feedback to help us improve our content by contacting info@helapet.co.uk.

Pierette Oates
Office Administrator

Stanton Pereira
Maintenance Technician

Accessing Helapet products just got a whole lot easier

We are delighted to offer our website visitors a much improved online experience with the launch of our fully re-designed website, a leap forward in modern design, pleasing aesthetics and accessibility.

Designed with the customer in mind, the cleaner, decluttered look is now fully compatible with today's computer browsers and hand-held devices, allowing you to view our entire product portfolio in whatever format or screen size you desire.

Fully updated, our richer online content is now even easier to access with quick navigation, easy-to-use select menus and improved page structure.

Several new interactive features include a dedicated sample request page with access to a free sample from over 80% of our consumables portfolio.

Why not let us know your opinion by taking our online survey by 5th May and be in with a chance of winning a brand new Asus Tablet.

Go to www.helapet.co.uk/surveycompetition to learn more.

Check out the fresh new helapet.co.uk now and remember to share with your colleagues.

Feature products

Helapet unveil new products for 2017

This year Helapet launched a new range of consumables as part of our growing portfolio of sterile transfer and capping devices.

Female Luer Lock Connectors facilitate safe, contaminant-free transfer of fluids from a master syringe into smaller doses.

Our new standard Connector facilitates rapid transfer of viscous liquids, whereas the Micro Channel Connector supports accurate transfer of smaller, expensive syringe doses.

Both Connectors are constructed of latex free and pyrogen free materials, supplied sterile and individually blister packed.

IV5713

IV5712

Product Code	Pathway Size	Sales Unit
IV5713	3.95mm Ø	100 pcs/pck
IV5712	0.65mm Ø	100 pcs/pck

Our new Tamper Evident IV Syringe Cap

is the practical solution for the protection of syringes once they have left the sterile preparation area. An alternative to sticky tamper-evident tape or shrink wrap, each can be easily applied to any Luer Lock syringe.

Product Code	Sales Unit
IV5750R	10 x 10 pcs/pack

For more information or to place an order, contact Helapet on **0800 0328 428** or email sales@helapet.co.uk. FREE sample products are now available on request.

 Stand 30

Let us know if you are attending and would like to meet by emailing us at info@helapet.co.uk. For information on how you can register as a delegate to any of these events, visit the events page on the Helapet website.

We have a special **meet the team** for this issue, introducing both of our Cleanroom Team Leaders who supervise operations in our ISO Class 7 cleanrooms and implement Lean and Six Sigma methodologies.

Trish Moth
Cleanroom Team Leader

Trish Moth

Since joining the team in 2014, Trish has been involved in the production of our cleanroom consumables including PharmaPack® Multi-Packed Syringes, sterile sprays, wipes and sharps bins. Trish was promoted from Cleanroom Operator to Cleanroom Team Leader in 2015.

Trish is now in charge of one of our two in-house class 7 rated cleanrooms which runs our alcohol filling line, packing of bagged consumables and running of testing equipment, leading to record monthly achievements.

As part of her role as Cleanroom Team Leader, Trish has also been a key player in the implementation of 5S, where she has created Lean procedures and cleanroom training programs.

Iwona Kosinska
Cleanroom Team Leader

Iwona Kosinska

Iwona has been an integral part of the Helapet team since joining in 2015. She has extensive knowledge and understanding of operations in both of our in-house cleanrooms and was promoted from Cleanroom Operator to Cleanroom Team Leader last year.

Iwona now manages our dedicated ISO Class 7 cleanroom responsible for filter manufacturing and has overseen recent record monthly figures for filter output.

Packaged to your preference

Did you know Helapet now offer our standard PharmaPack® Multi-Pack Syringes, Sterile Sharps Bins and other sterile consumables in triple-bagged format? Well just so you know we offer the same quality product with not just two, but three levels of sterile barrier protection supporting best practice in aseptic transfer.

Using triple-bagged products supports the need to eliminate harmful contaminants such as spores from reaching grade A working environments, allowing Pharmacy Technicians to effectively remove one sterile barrier for each stage of the transfer process.

Reduce the risk of bioburden, reduce processing time and increase your safety and confidence. Choose triple-bagged products from Helapet.

Request a quotation by emailing us at sales@helapet.co.uk or call **0800 0328 428**.

Great filters, greater service...

Helapet's range of standard and bespoke inline disposable filters are manufactured in-house by our cleanroom team in our ISO Class 7 rated facilities, equipped with the latest machinery and tooling to provide a quick yet highly accurate output.

Supported by the ongoing implementation of 5S methods, lead times between initial design to completed product continue to shorten for the benefit of our valued customers.

Taking great pride in our one-to-one consultation, see what our customers have had to say.

Fulfil your unique filtration requirements by visiting www.filterdevices.co.uk and choose the Vari-Disk® service to build your desired filter device.

“ We changed our filter supplier to Helapet two years ago. In this time we have been impressed by the quality of the filters provided. Deliveries and lead times have been very good. An additional benefit has been the level of support on a technical basis, advising of the materials to be used and the professionalism of the sales and engineering staff. ”
