PRESS RELEASE

Intrathecal, Safely, Securely

Safely

The **NEW** Helapet 10x8 **Intrathecal Transport Bag** offers a safe and convenient method of ensuring critical Intrathecal therapy is delivered accurately to the right patient. It can help your clinical and nursing staff with the correct identification and handling of these sensitive drugs.

Securely

Following established procedures and drug protocols for the handling and administration of Intrathecal therapies is of primary concern to all clinical staff. The **NEW** Helapet **Intrathecal Transport Bag** enables pharmacy staff to correctly identify and log both patient and practitioner, to reduce the chance of error at the point of care.

“Our aim is to provide a product that easily identifies intrathecal, and keeps them apart from other therapies. We have carefully researched the requirements of many hospitals and designed a product to match their needs, providing a safe and secure transport mechanism,” quotes Glenn Kenworthy, Marketing Manager.

For further information and **FREE** samples please contact the Helapet sales team on: 01582 501980 or via email at: sales@helapet.co.uk
