**Company:** Helapet Ltd

**Contact:** Chris Steng

**Date:** August 2013

**Title:** **Setting the standard with the new Berner Nitrile Glove from Helapet**

**Enhancing the protective properties of Nitrile with a new unique blend, the [new Berner Nitrile Cleanroom glove](#) guarantees over 8 hours of chemical resistance without compromising on comfort, grip or dexterity.**

Designed to meet the latest EN-374 and ASTM standards in permeation and viral testing, the Berner Nitrile glove offers exceptional protection against several hazardous substances including cytotoxics, bio-agents and viruses. The robustness of the nitrile composition certifies easy handling of long chemical exposures without the need for double gloving, saving on time and expense.

Maintaining superior glove strength customers are treated to the highest level of touch sensitivity and ease of movement, with textured finger tips allowing safe handling of both wet and dry products. This ideal combination of strength and comfort is complimented with a long 300mm beaded cuff for additional protection above the wrist.

Completely latex-free and powder-free, the new Berner Nitrile glove can be safely used by allergen suffers and in designated latex-free zones. Quality presented in low-particle poly-packaging, the Berner Nitrile glove can be used for precise chemical handling in upto Class 100 (ISO 5) cleanroom environments.

As the exclusive UK and Ireland distributor for the highly regarded Berner brand of Personal Protective Equipment, Helapet are delighted to offer the new Berner Nitrile glove both sterile and non-sterile in a full range of sizes.
