SteriClean Alcohol Spray
Same High Quality - NEW Economy Version

SteriClean Alcohol Sprays are now available without the 'bag in the bottle' closed system as an economic alternative for areas where high volumes of alcohols are used during cleaning routines.

If you have a high volume unit, where an entire bottle of spray is used at a time and there is no requirement to store part bottles for future use, then this is the version for you – offering excellent cost savings and value for money.

The sprays are fully validated and contain the same high quality 70% alcohol with WFI and are supplied individually double bagged and sterile for cleanroom use.

For more information or to try the sprays in your unit, please contact our sales team on 0800 0328 428 or visit our website www.helapet.co.uk and submit a request on-line.
