SteriClean® Flowrap 100 Wipes **A High Quality alternative to tub wipes for cleanrooms**

SteriClean® impregnated wipes are now available in pouches of 100, offering a convenient and cost effective, high quality alternative to tub wipes for cleanrooms, with the added advantage of reduced packaging waste.

The peel and reseal label allows the pack to be resealed between wipes, avoiding shredding, linting and the drying out of wipes between use.

SteriClean® Flowrap alcohol wipes are impregnated with 70% v/v isopropyl alcohol or denatured ethanol in water, and are supplied in pouches of 10 or 100. They are gamma irradiated to not less than 25KgY, ensuring sterility and making them an ideal choice for aseptic areas.

To try the new Flowrap 100 in your unit please contact Helapet for **FREE SAMPLES** on **0800 0328 428** or visit our website on www.helapet.co.uk.
