New paper free packaging for SteriClean Wipes

Newly available in paper free packaging for cleanroom areas, SteriClean Dry Wipes offer a new level of cleanliness.

SteriClean's low linting, high absorbency characteristics, coupled with its inherent strength when wet or dry, makes SteriClean the ideal wipe for maintaining good aseptic practice. Provided sterile and ready folded, a clean section can quickly and efficiently be used for each wiping action and overlapping stroke.

Used in conjunction with our SteriClean Alcohol Sprays, SteriClean Wipes ensure greater reductions in contamination levels than wiping or spraying alone. For more information and free samples of our SteriClean wipe range, please contact our sales team on 0800 0328 428.
