PRESS RELEASE

Be Ultrasafe® with your Chemotherapy Drugs

Helapet now offers you the facility to be UltraSafe® in your re-constitution, aspiration and transfer of Chemotherapy Drugs.

The Ultrasafe® Withdrawal Needle has been specifically developed for the safe preparation and withdrawal of chemotherapeutic drugs from stopper bottles and vials. The Ultrasafe® allows you to re-constitute the drug, aspirate it back into the syringe and then transfer into the final IV container. You can do all this safely, easily and quickly in a closed system.

“Operator safety is a major priority for pharmacy staff, when handling Chemotherapy drugs,” states Glenn Kenworthy, Marketing Manager at Helapet. “This excellent product ensures a *closed system* can be used at all times.”

For further information and FREE samples please contact the Helapet sales team on 01582 501980 or via email at: sales@helapet.co.uk
